How to retrieve the MAC address of an Android device

Device needs to be connected to the Webguard Router WiFi before proceeding.

1. Go to **Settings > Network & Internet > Network** or **Internet**
2. Click on the **Settings** icon next to your WiFi name
3. Click on **Privacy**
4. Choose **Use device MAC**
5. Go back to the previous screen
6. Scroll down and look for **Device MAC address**
