

iOS (iPhone or iPad)

How to retrieve the MAC address of an iOS device

Device needs to be connected to the Webguard Router WiFi before proceeding.

1. Go to **Settings > WiFi**
2. Click on the **Information** icon next to your WiFi name
3. Disable **Private Wi-Fi Address**
4. Tap **Continue** at the prompt
5. The MAC address will be visible as the **Wi-Fi Address**
